

Organizational Report of Inventory and Operational News (ORION)

MANAGES, FILTERS, REPORTS, AND STORES DAILY AND HISTORICAL INFORMATION FOR WEAPONS SYSTEMS, PERSONNEL AND INVENTORY

The Organizational Report of Inventory and Operational News (ORION) program is a custom database created to provide clients with a central location to obtain and share information related to their mission, assets, personnel, equipment, and movement. Authorized users have the ability to view data pertaining to aircraft flights, personnel and maintenance, while also providing fleet readiness and tracking assets in real time. Several layers of manipulation are made available to designated personnel to meet your company's needs. ORION provides a primary site to gather necessary information for Reliability, Availability and Maintainability (RAM) data analysis for all mission equipment items. ORION gathers the information entered from reporting locations around the world and delivers automated status reporting through email and to mobile devices. Additionally, the portal develops DA Form 1352 and the Commander's Statement, reducing administrative workload and enabling ad hoc presentation of the mission status.

THREE TIER REPORTING SYSTEM

The ORION system consists of three separate levels for reporting:

- Level 1: Executive dashboard displays multiple programs at a glance
- Level 2: Program dashboard displays all aircraft, personnel and inventory items
- Level 3: Individual asset, personnel or inventory item information

The portal has an intuitive interface layout for optimal usability and simple navigation. The site stores, manages, and filters entered data and offers reporting options for a range of information including:

- Weapons System Status and Daily Data
- Maintenance and Fault Events

- Reliability, Availability and Maintainability Data
- Personnel Training Records and Deployment Status
- Inventory (GFE and CAP)

This site was designed with future program expansion in mind. The layout can be securely duplicated as needed for new ACFT individual program portals, all connected via a single administrative portal. ORION grows with your company and missions.

Our GSA Schedules:

SRCA covers a wide array of products and services, including software development, graphic design, training services and safety and operational support.

Contract: GS-00F-0031Y

Contract: GS-00F-0032Y

- Advertising & Integrated Marketing Solutions (AIMS) (541)
- General Purposes Commercial Information Technology Equipment Software and Services (IT) (70)
- Mission Oriented Business Integrated Services (MOBIS) (874)
