

Capabilities Statement

SRCA is a veteran owned LLC, with over 27 years experience providing quality services and products to the United States military, the federal government, and commercial users. SRCA's competent team of project managers, programmers, database developers, graphic artists, instructional designers, and safety engineering staff possess the expertise and resources to deliver on-time technical services and products that represent the highest standards at a competitive cost.

SRCA has a long history of providing secure, professional services for the aviation industry. President and CEO, Mr. Rendzio, holds an advanced degree in Systems Management and an undergraduate in Safety from Embry Riddle Aeronautical University. He has expertise in specialized aviation safety to include support for aerial intelligence operations and technical software. SRCA utilizes its aviation roots to provide mishap investigation assistance, help Maintenance, Repair, and Overhaul (MRO) companies meet Defense Contracting Management Agency (DCMA) 8210.1 requirements, support system safety engineering efforts, development of Minimum Essential Equipment Listing (MEL) requirements, and customizes training products for the industry.
